

## BAG-A-BOX

This new innovative packaging solution combines the best features of a paper shopper & a corrugated shipping box into one single packaging solution

The corrugated liners stiffen and reinforce the shopping bag expanding the usable void while providing a secure closure.

**SECURE** Locking corrugated tabs discourage taking or "adding" anything to/from this shopper

**STACKABLE** Can easily stack inside courier network, like a box, but less expensive and easy for the consumer to carry

**SHIPS FLAT** takes up less space than a corrugated box that would traditionally be placed INTO a paper shopper.

- Perfect for Ship From Store programs
- Ideal for supermarket food orders, no more collapsing T-shirt bags in customers trunks!
- Paper shopper can be printed to match your current line
- "Cold Pack" Technology also available
- "International Patent Pending"
